
TECHNICAL DATA SHEET

MCW Fibreglass Baffles

MCW Fibreglass Baffles are vertically suspended, frameless sound-absorbing panels designed to deliver superior acoustic performance and modern visual appeal.

Available in rectangular or wave-shaped profiles, they provide versatile design options for any interior space.

Featuring encapsulated edges, these baffles achieve Class A sound absorption (NRC 0.95).

Supplied in standard White or customizable colors to meet specific architectural and project requirements.

Key Benefits

- Class A Sound Absorption (NRC 0.95)
- Fire Rating: B1-s1, d0
- Multiple standard sizes available
- 40mm thickness

Applications

MCW Fibreglass Baffles enhance acoustics and visual appeal across various environments, including:

- Offices
- Classrooms
- Halls
- Corridors
- Open-plan areas

Technical Details

- Rectangular Dimensions: 1200x300x40mm, 1200x600x40mm or 1800x300x40mm
- Wave-Shaped Dimensions: 1800x300x40mm, 1800x600x40mm
- Weight: [Weight varies by size]
