
TECHNICAL DATA SHEET

MCW Fibreglass Rafts

MCW Fibreglass Rafts are suspended horizontally to create an innovative, frameless sound-absorbing panel system that enhances the acoustic and visual appeal of interior spaces.

They can be rectangular, square or circular to offer unique design possibilities for rooms.

They offer a high Class A absorption class (NRC 0.90) with encapsulated edges.

They are available in standard White or customisable colours to suit your design and project.

Key Benefits

- Class A Absorption (NRC 0.90)
- Fire Rating B1-s1,d0
- Range of Sizes Available
- 40mm Thickness

Applications

MCW Fibreglass Rafts are used to create distinct visual designs in offices, classrooms, halls, corridors, and open-plan areas.

Technical Details

- Rectangular Dimensions: 1800x1200x40mm, 2400x1200x40mm
- Square Dimensions: 1200x1200x40mm
- Circular Dimensions: 600mm diameter, 800mm diameter, 1600mm diameter
