

TECHNICAL DATA SHEET

MCW Mineral Fibre Ceiling Tiles

MCW Mineral Fibre Ceiling Tiles feature fine, subtle patterns and offer high performance Class C sound absorption (NRC 0.85).

Designed with a non-directional visual and a sturdy edge structure, these tiles deliver superior acoustic control along with 99% relative humidity moisture resistance.

Key Benefits

- Class C Acoustic Absorption
- 34 dB Sound Attenuation Performances
- 86% Relative Humidity (RH) Moisture Resistance
- Suited to offices, corridors and classrooms

Applications

MCW Mineral Fibre Ceiling Tiles are ideally suited for offices, classrooms, communal corridors, open-plan spaces, and general commercial environments.

Technical details

Tile Dimensions	600mm (W) x 600mm (L) (595mm x 595mm Nominal)
Thickness	20mm
Acoustic Performance	Class C Sound Absorption (NRC 0.85), 34 dB Attenuation
Light Reflection	86%
Reaction to Fire	Fire Rating B1-s1,d0
Finish	White Finish
